

PANACHE
HERITAGE FLOOR

As a result of another environmental initiative using skilled craftsmanship and state of the art technology Australian Solar Timbers introduces Panache solid hardwood flooring made exclusively from reclaimed timber.

A solid Australian hardwood floor is a pure organic product which is carbon neutral, free of allergens and provides the longest service life.

The variations in character markings, colour and grain is unique to each hand selected reclaimed timber board used in Panache flooring and can never be replicated. Every AST Panache timber floor is a natural artwork with a living history.
