 **TimberLay**

### The Eco-Friendly Flooring

TimberLay is a secret nail micro-tongue and groove flooring system that's fast, eco-friendly, durable and naturally beautiful. It's also 100% Australian. Our Northern NSW hardwood is naturally solar kiln -dried by the sun to ensure perfect results.

TimberLay is manufactured under the Australian Timber Industry Certification (ATIC) scheme of quality assuring the highest standards of production and product are maintained.

### Fast Facts

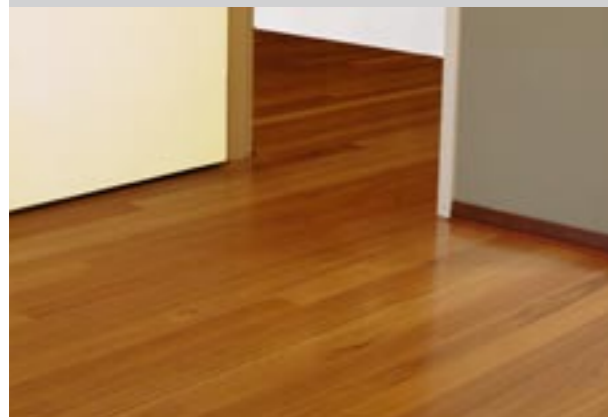

Size • 80mm X 12mm

### Good for you

- Wide Range of different Northern NSW hardwood species and colour hues available.
- Tough, hardwearing and low maintenance.
- Low antistatic and dust properties – better for avoiding allergies and asthma.
- Cost effective, without compromising quality.
- Designed to be laid directly over any dry flat structural surface including concrete slabs, plywood and existing floors. The 12 mm thickness is the same as most carpet allowing for easy substitution – no need to cutback or alter doors in most cases.
- Able to re-sand in heavy-duty situations further extending life of the floor.
- Supplied in individually wrapped bundles in packs for easy handling and delivery.

### Good for the environment

- Solar kiln dried reducing green house emissions.
- An environmentally friendly, renewable, energy-efficient resource.
- Adds a natural warmth, character, uniqueness and value compared with other floor coverings.
- Australian owned and manufactured from timber sourced from government sustainably managed and owned forest resources.

## Specifications

### Dimensions

Cover Width	80mm
